Research Symposium & Expo on Saturday, September 7, 2024

A huge thank you to all of our ASDRP families who support our students' drive as young and aspiring research scholars. ASDRP Research Symposium and Exposition is a very important event in the development of our student researchers. The day challenges our students to continuously produce results in their areas of research, work collaboratively with their research teams, problem solve, overcome the fear of public speaking and speak knowledgeably and concisely about their research to guests and family members.
