

September 26, 2022

Volume, 2 Issue #2

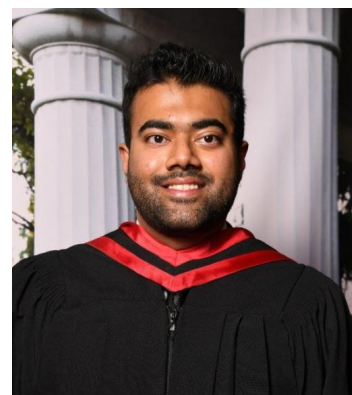

Over 50 ASDRP Parents joined us on Saturday morning to enjoy some coffee and refreshments and get to know ASDRP. Fantastic group and so happy you are a part of ASDRP!

Faculty Spotlight: *Biological, Human, and Life Sciences*

Clinton Cunha

[Clinton's website](#)

Clinton has a Masters in Bioinformatics (University of Guelph) and a Masters of Science in Cellular and Molecular Medicine (University of Ottawa). He also has an Honors Bachelor's degree in Biological Sciences (Carnegie Mellon University). His main areas of focus include Bioinformatics, Data Analysis, Python programming, Biology, Science, Cancer Research and ESL. Professionally, Clinton is a qualified Bioinformatician/Biologist/Instructor and knows how to deal with different types of biological data to derive meaningful relationships using Python, SAS, R and Unix.

Faculty Spotlight: *Chemistry, Biochemistry, and Physics*

Neelima Sanganeni

[Dr. Sanganeni's website](#)

Dr. Sanganeni holds a PhD in Nanotechnology from the Indian Institute of Science and an MS in Electrical Engineering from the University of Washington. Neelima is a materials scientist with an expertise in Nanomaterial fabrication, characterization and failure analysis. She is interested in research on sustainable materials and processes used to enhance quality of life without harming our environment. At ASDRP, she leads a vibrant research group of high school students interested in the interface of green energy, nanomaterials, and materials engineering.

Faculty Spotlight: *Computer Science and Engineering*

Suresh Subramanian

[Suresh's website](#)

Suresh Subramaniam is a seasoned executive and data scientist with experience in managing large operations and applying data science to solve business problems. He has several decades of industry experience, from companies big and small, and he brings a unique perspective in mentoring students to be young professional data scientists.

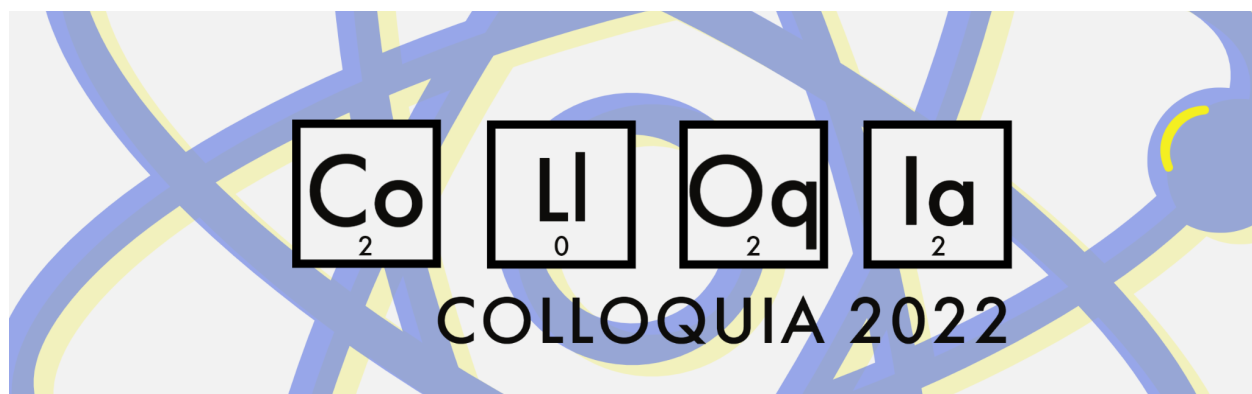

Upcoming Events

The ASDRP Researcher Interview Series is back again for Fall 2022!

Throughout the fall, we will be conducting interviews with researchers to capture what their experience has been like at ASDRP. They will be short and focus on broad topics like getting to know them, what they have been researching, and what it means to be a researcher. The interviews will be via Zoom and posted to YouTube. More details will be announced via email.

Researchers can begin to sign up [here](#).

Colloquia tomorrow Sept 27th from 7-8:30 pm

Check the colloquia [webpage](#) for the upcoming research presentations.

Saturday Seminars

Last week - **Researcher Code of Conduct**

Next up: Saturday, October 15

"Introduction to Scientific Writing"

Every third Saturday of the month

10 AM on Zoom

- Professional dev't (writing/speaking)
- Guest speakers from Academia & Industry
