

## Biomedical Cluster Guest Speaker Seminar Series

# “A Deep Look into Craniofacial Sciences”

**Sunday, July 19**  
**2:00 – 3:00 PM PST**

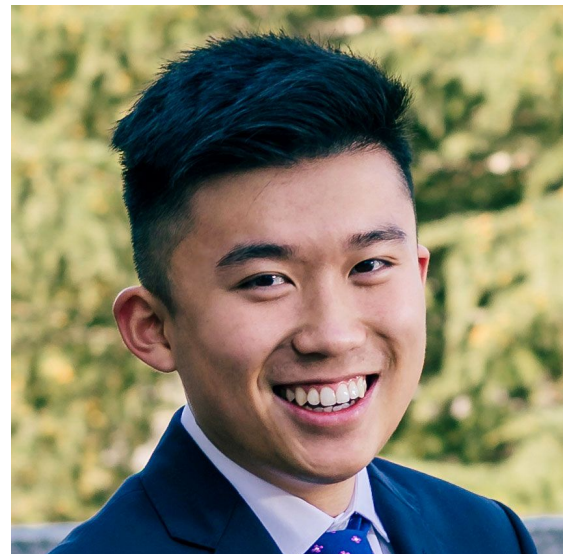

### About the Speaker

Mr. Tony Qu completed his undergraduate from University of California, Berkeley with a degree in Molecular and Cell Biology with a focus in Neurobiology and is now doing his PhD at UCSF for Oral and Craniofacial Sciences. His current work includes understanding the mechanisms of craniofacial defects and finding effective therapeutics to treat it. His prior research includes studying the molecular details of mandibular size and shape and how that has impacted patients in the long run. Tony has also done research in neurobiology, with a focus on prey capture behavior and neural representation in larval zebrafish.

**UCSF**
